## Technique #3: Managing a Common Resource Pool

www.RefineM.com
16

## Resources and Subprojects

- \* Did you know you could share resources among your projects? There are several ways:
  - ✓ Share a pool in a master project
  - ✓ Create a “dummy” project just for the resource pool

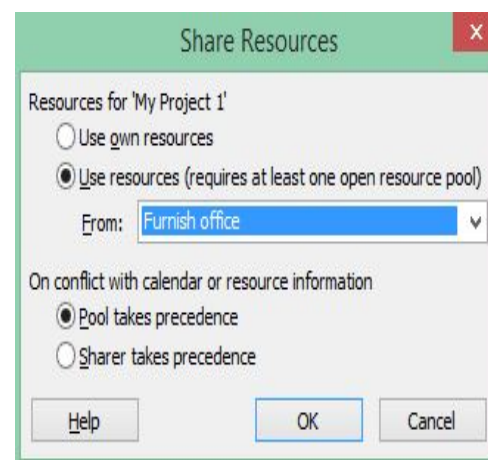

RefineM

17

www.RefineM.com

## Sharing Resources

- \* First, define a resource pool in a project
  - ✓ Assign resources to the “Resource Name” tab
  - ✓ Fill in information about their availability
- \* Under Resource Pool, select “Share Resources” and “Use Resources From” selecting an MPP file

RefineM

18

www.RefineM.com

## Managing Conflicts

- \* Use “Pool Takes precedence” if working with other projects/PMs
  - ✓ That way, pool resolves conflicts and PMs don’t overwrite each other
  
- \* If you are the only PM using the resource pool, you can use “Sharer takes precedence”
