

# Kanban Boards

RefineM PROJECT MANAGEMENT CONSULTING

[www.RefineM.com](http://www.RefineM.com)

**NK Shrivastava**, PMP, RMP, ACP, CSP, SPC4  
CEO/Consultant/Agile Coach - RefineM

1

## Agenda

1. What is Virtual Lunch & Learn
2. Your Expectations from this Webinar
3. Kanban Boards
4. Upcoming Learning Opportunities from RefineM
5. How to get 1 PDU for this Webinar?
6. Rewarding Our Star Attendees
7. Q & A

RefineM

2

[www.RefineM.com](http://www.RefineM.com)

## RefineM's Virtual Lunch & Learn

**This is a monthly webinar delivered during the lunch hour in the first week (Wednesdays) of every month.**

**It's designed to help you learn while you eat lunch, providing a relaxed environment to enhance your experience.**

**The monthly webinars will cover a variety of Project Management / Agile topics.**

## Your Expectations

What are your expectations from this webinar?

Why are you here today?

# NK Shrivastava, PMP, RMP, ACP, CSP, SPC4

## RefineM

Helping organizations turn their project management capability into a *competitive advantage*

CEO/Consultant since Dec 2011

- \* Agile Transformation/Coaching/Adoption
  - ✓ Agile Coach @ IBM
- \* Project Management/ Process Improvement Consulting and Training
- \* Products for Project Professionals
  - ✓ Essential Gear for Project Managers
  - ✓ PMP Exam Simulator
  - ✓ PMP Videos at Vimeo

### My professional journey b/f RefineM

20+ years of Successful Project Leadership

- \* Led 100s of projects of all sizes, successfully
- \* Recovered many projects, saved millions of \$
- \* Implemented numerous process improvements
- \* Coached/mentored 100s of PMs, and executives
- \* Board Member – SWMO PMI Chapter (2008-2014)

RefineM

## What's New at RefineM

RefineM PROJECT MANAGEMENT CONSULTING

www.RefineM.com

6

## What's New at RefineM

### \* Upcoming Free Webinars

Webinar Title	Date
Role of Wireframes in Agile Requirements	Dec 6
PMP Exam Changes	Jan 3

### \* New Training and Outreach

- ✓ New class – First Steps Toward Agility
- ✓ New workshop – Lean/Agile Process Improvement Workshop  
*(Achieve 15-40% efficiency improvements in 4-8 weeks)*
- ✓ New live PMP video chat sessions every Saturday, 9-10 AM Central

### \* PMP Exam Prep Test Simulator

- ✓ <https://Examprep.RefineM.com>

### \* PMP Videos at <https://vimeo.com/ondemand/refinempmpexamprep>

## Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value:

**Individuals and interactions** over processes and tools  
**Working software** over comprehensive documentation  
**Customer collaboration** over contract negotiation  
**Responding to change** over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

*Developed in 2001 by 17 agile advocates at Snowbird resort in Utah*

## Agile Twelve Principles

1. **Satisfy the customer** thru early and continuous delivery
2. **Welcome changing requirements** even late in development
3. **Deliver working software frequently** a couple of weeks to a couple of months
4. **Work together daily** (business people and developers)
5. **Motivated individuals**, build projects around them, and give them freedom
6. **Face-to-face conversations** is the most efficient and effective method
7. **Working software** is the primary measure of progress
8. **Sustainable development** i.e. maintain a constant pace indefinitely
9. **Continuous Attention** to technical excellence & good design enhance agility
10. **Simplicity** – the art of maximizing the amount of work not done – is essential
11. **Self-organizing teams** deliver the best architectures, requirements, and designs
12. **At regular Intervals** the team reflects on how to become more effective

## Agile Practices

- |  |                                  |
|--|----------------------------------|
| 1. <b>Maintaining a Backlog / Prioritized List</b> | 1. Continuous integration (CI)   |
| 2. <b>Progressive elaboration</b>                  | 2. Iteration planning meeting    |
| 3. <b>Daily standups</b>                           | 3. Planning poker                |
| 4. <b>Frequent reviews / demos</b>                 | 4. Refactoring                   |
| 5. <b>Retrospectives</b>                           | 5. Test-driven development (TDD) |
| 6. <b>Use of Wireframes for UI design</b>          | 6. User Stories                  |
| 7. <b>Visualizing work through Kanban Board(s)</b> |                                  |
| 8. Limiting Work In Progress (WIP)                 |                                  |
| 9. Customer involvement throughout project         |                                  |
| 10. Smaller iterations                             |                                  |

www.RefineM.com

## Top 10 Agile Practices for Waterfall Teams

1. **Maintaining a Backlog / Prioritized Requirements**
2. **Progressive Elaboration**
3. **Daily Standups**
4. **Frequent Review/Demos**
5. **Retrospectives**
6. **Using Wireframes for UI Design**
7. **Visualizing Work through Kanban Board(s)**
8. **Limiting Work in Progress (WIP)**
9. **Customer Involvement Throughout the Project**
10. **Smaller Iterations**

## Mapping to Agile Practices

**To which Agile principles would you map the practice of visualization?**

## Agile Twelve Principles

1. **Satisfy the customer** thru early and continuous delivery
2. **Welcome changing requirements** even late in development
3. **Deliver working software frequently** a couple of weeks to a couple of months
4. **Work together daily** (business people and developers)
5. **Motivated individuals**, build projects around them, and give them freedom
6. **Face-to-face conversations** is the most efficient and effective method
7. **Working software** is the primary measure of progress
8. **Sustainable development** i.e. maintain a constant pace indefinitely
9. **Continuous Attention** to technical excellence & good design enhance agility
10. **Simplicity** – the art of maximizing the amount of work not done – is essential
11. **Self-organizing teams** deliver the best architectures, requirements, and designs
12. **At regular intervals** the team reflects on how to become more effective

## Mapping to Agile Principles

Agile Practice	Matching Agile Principle
Maintaining Backlog	Welcome changing requirements
Progressive Elaboration	Satisfy the customer through early and continuous delivery of valuable software
Smaller Iterations	Deliver working software frequently
Daily Standups	Work together daily
Retrospectives	At regular intervals, the team reflects on how to become more effective
Frequent Review/Demos	Working software is the primary measure of progress
Using Wireframes for UI Design	Continuous attention to technical excellence and good design enhance agility
Visualizing Work through Kanban Board(s) & limiting WIP	Sustainable development
Customer Involvement Throughout the Project	Business people and developers must work together daily throughout the project

## Questions from Attendees

1. Basic overview of Kanban (Cristy G.)
2. How can we encourage Kanban adoption (instead of Scrum) for Software Development? (Mike F.)
3. What are easy and free tools to pilot and get the culture to buy into the concept? (Sunil C.)

## Remember, Agile Is

- **Iterative**
- **Customer Focused**
- **Data Driven**

## Kanban Board(s)

- What is it?
- How to adapt to a Waterfall Team?

RefineM PROJECT MANAGEMENT CONSULTING

www.RefineM.com

17

## What is Kanban?

- \* **Kanban – from Japanese word for “visual board”**
  - ✓ Developed in a manufacturing context
  - ✓ Taiichi Ohno developed Kanban process for Toyota Production System
  - ✓ “Kanban” refers to a card that signals the need for a component
  - ✓ Kanban process is a pull system, rather than push system
    - Components are created just-in-time as they are needed, reducing waste

www.RefineM.com

# Kanban

## Rules

1. Visualize the workflow
2. Limit Work in Progress (WIP)
3. Measure and Optimize the flow

## Tools

1. Kanban Board

## Activities

1. Move items through the states
2. Identify and resolve bottlenecks

RefineM

Adapted from *Essential Kanban – Condensed Guide* by David J. Anderson and Andy Carmichael.  
Copyright © 2015 by Lean Kanban Inc. All Rights Reserved.

www.RefineM.com

## What is the Kanban method?

**The Kanban Method** is a set of principles and practices that are applied to an existing process.

Adapted from *Kanban: Successful Evolutionary Change for Your Technology Business* by David J. Anderson. Big Hole Press Inc. Copyright © 2010 by David J. Anderson

www.RefineM.com

## Kanban Principles

The three *change management principles* of Kanban are:

1. Start with what you do now
  - Understanding current processes, as actually practiced
  - Respecting existing roles, responsibilities, and job titles
2. Agree to pursue improvement through evolutionary change
3. Encourage acts of leadership at every level, from individual contributor to senior management

The three *service delivery principles* of Kanban are

1. Understand and focus on your customers' needs and expectations
2. Manage the work; let people self-organize around it
3. Your organization is an ecosystem of interdependent services, steered by its policies; reflect regularly on their effectiveness and improve them.

Adapted from *Essential Kanban – Condensed Guide* by David J. Anderson and Andy Carmichael.  
Copyright © 2015 by Lean Kanban Inc. All Rights Reserved.

[www.RefineM.com](http://www.RefineM.com)

## Kanban core practices

1. Visualize
2. Limit WIP
3. Manage flow
4. Make policies explicit
5. Implement feedback loops
6. Improve collaboratively, evolve experimentally

(using models and the scientific method)

RefineM

22

## Kanban Board – How Work is Visualized

### \* Kanban Board consists of:

- ✓ A board or wall divided into columns
  - Each column represents an activity or state of the process
  - A basic process flow is “Ready, Doing, Done”
  - Can also include a column for “Blocked” work
- ✓ Kanban Cards
  - Physical or virtual representation of a work item
  - Can be sticky notes, index cards, or digital card on system like Trello
  - May have description of work, start date, deadline, assigned to

## Kanban Board Example

## Benefits of Kanban

- \* **Improved Quality**
  - ✓ As a pull system, Kanban limits or eliminates multitasking
  - ✓ Kanban process doesn't allow shipping with known defects
- \* **Faster turnaround of work requests**
  - ✓ Kanban process improves lead time and process flow
  - ✓ Work in Process (WIP) is limited, leading to faster turnaround
- \* **Exposure and elimination of process bottlenecks**
  - ✓ Visualizing work exposes process bottlenecks
  - ✓ Value stream mapping exposes value-add and wait time (waste)
- \* **Reduced waste**
  - ✓ Work is pulled only when it is needed and the team has capability
  - ✓ Teams have idle time and less waste is produced
- \* **Improved teamwork**
  - ✓ Visualizing the workflow improves team communication
  - ✓ Limiting WIP keeps the team at right capability for efficient flow

## Starting Kanban

1. Define the Process
2. Identify Variability of Inputs
3. Model the Workflow
4. Create the Kanban Board
5. Add Swimlanes, Queues or Buffers
6. Add work items
7. Define WIP Limits
8. Measure and Manage the Flow

看板

## 1. Define Process and exit criteria

- \* **What are the steps of the process?**
  - ✓ They will become your columns
- \* **What are the criteria to move?**
  - ✓ What criteria need to be satisfied for work items to move from left to right?

## 2. Identify Variability of Inputs

- \* **What types of work items come into the queue?**
  - ✓ For example, requirements, features, user stories, bugs, defects
- \* **What are different priorities?**
  - ✓ For example, standard, expedite, date driven etc.
- \* **How big are the items coming into the queue?**
  - ✓ Big items and small items both need visibility

### 3. Sketch or Model the Workflow

- \* **Make a basic sketch of the process flow**
- \* **This is a good time to do value stream mapping**
  - ✓ Timeline of the process showing value-added time and wait time

### Value Stream Mapping

- \* Lean manufacturing technique
- \* Illustrate flow of info or materials in a process
- \* Helps determine where waste can be removed
- \* Calculate process efficiency
  - ✓  $\text{Value-added time} / \text{Total cycle time}$

## Value Stream Mapping Example

Total cycle time = 120 minutes

Wait time = 30 minutes

Process cycle efficiency = Total value-add time / Total Cycle time

90/120 = 75%

RefineM

www.RefineM.com

## Value Stream Mapping Example

Total cycle time = 24 working hours

Wait time = 16 working hours

Process cycle efficiency = Total value-add time / Total Cycle time

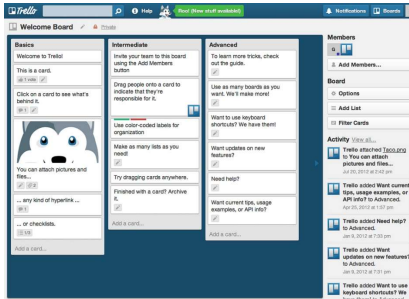

8/24 = 33%

RefineM

www.RefineM.com

## 4. Create the Kanban Board

- \* **Physical board: Whiteboard, sticky notes, markers**
- \* **Digital: Trello, Leankit, Agilezen, VersionOne**
  - ✓ Trello shown below

## 5. Add Swimlanes, Queues, Buffers

- \* **Swimlanes can be used for:**
  - ✓ Separating work based on individual or department
  - ✓ Separating work by size or priority
- \* **Queues give greater visibility to blocked items**
  - ✓ Blocked / parking lot column for work with external dependency
  - ✓ NOT to be used to procrastinate on work
- \* **Buffers can be used to better manage flow**
  - ✓ For example, "Ready for Testing" moves to "Testing"

## 6. Add Work Items

- \* **Work items could have all or most of the following:**
  - ✓ Description of the work
  - ✓ Type of work
  - ✓ Start date (for tracking service request fulfillment requirements)
  - ✓ Deadline dates, if any
  - ✓ Who it is assigned to
  - ✓ Tracking # if there's an electronic system
  - ✓ Context

## 7. Define WIP Limits

- \* **Define how much work can be in each column**
- \* **Throttle incoming work if it exceeds limits**

## 8. Measure and Manage the Flow

- \* **Flow can be measured by:**
  - ✓ The queue/Work in Progress – leading indicator
  - ✓ Customer Lead Time – lagging indicator
  - ✓ Throughput – lagging indicator
  - ✓ Process Efficiency – lagging indicator

Source: *PMI-ACP Exam Prep*, Second Edition by Mike Griffiths.

## Daily Kanban Meeting

1. The three standard Scrum Daily Standups questions are not relevant any more. Why?
2. Then, what should the team discuss in the daily Kanban meeting?
  - Where are things stuck in the flow?
  - How can we optimize the flow?
  - What can we improve today?
  - Celebrate "Done" items and leave the meeting on a positive note.

## Discussion

**Do you think you will be able to implement the practice of using Kanban boards in your organization?**

**Why or why not?  
(2 minutes)**

## Conclusion

- \* **Kanban improves:**
  - ✓ Lead time
  - ✓ Quality
  - ✓ Trust
  
- \* **Start from what you do now?**
- \* **Visualize work and define WIP limits**
- \* **Implement Kanban using physical setup or software**

**Get started with Kanban today**
